# 112. More Extensive Testing - Task 4 Part (b)

First explain what changes you made to which tables, what tests you ran, and why. Paste from your file <yourLastname\_yourFirstname>\_testscript.sql, the SQL statements you used for extensive testing including the procedure calls you made for this purpose, each followed by the screenshots of the records in the affected tables (and/or the error/warning messages).

Insert more records into 'Membership' Table to check complete upgrading rules

insert into `MembershipIO`,`FirstName`,`LastName`, `eMail`, `MembershipLevel`, `MemberExpDate`) values

### 113. Notes (optional)

Mention here anything worth noting, e.g., whether you faced any particular difficulty in completing any of these tasks, the nature and extent of any help you received from anyone, and why.

- 1. Updating other attributes for customer when they MembershipExpDate is expired. Initially thought it is not able to update Membership details when membership expired.
- 2. Updating information with no changes. This should give an error message.
- 3. Updating both MembershipExpDate and MembershipLevel. MembershipLevel is able to be upgraded once MembershipExpDate extended to the valid date
- 4. Nonmembership
